

## Card Warp (World's Greatest Magic) video DOWNLOAD

It's been said that Roy Walton invented one of the most original card effects of all time with his **Card Warp**, and ever since then, magicians have taken this concept to even more baffling heights. How can a flat two-dimensional object like a playing card turn completely over even when folded into another flat object?

You'll learn the secrets to Roy Walton's original two-card brainchild, as expertly performed and taught by Michael Ammar. Then, you'll watch and learn some different and original presentations for the original **Card Warp** as Scotty York performs and teaches his decidedly adult version and Eugene Burger uses the cards to demonstrate a horrifying history lesson. From there, you'll move on to even more visually amazing versions that use a card and a borrowed banknote, such as Michael Close's Dr. Strangetrick and Howie Schwartzman's Star Warp, as taught by Ammar again. Paul Diamond will demonstrate how to make the face of a deck change when it's wrapped in a bill, even when the spectator holds it. You'll also see and learn Bruce Cervon's Warp II, possibly the most baffling version of **Card Warp** ever created.
