

## A.E. 2.0 by Peter Eggink video DOWNLOAD

### *Effect*

The magician borrows a bill from the spectator. The bill is folded in half, and a pen or pencil is placed in the fold. Instantly and visually, the pencil penetrates through the bill, but this time the pencil melts through in **slow motion!** This is so visual, it's like watching a special effect in a movie! Of course, both bill and pencil remain unharmed.

Artificial Experience 2.0 is THE one effect you'll perform anytime, anywhere. It's easy to do and it uses a diabolical, clever method that even fools magicians!

### **Key Points:**

- Can be done with a borrowed pen or pencil
- Perfect for table-hopping and walk-around performances!
- Perform it surrounded!
- Extremely visual!
- Easy to do.
