

Flickwhich by Rian Lehman - video DOWNLOAD

An instant sandwich effect. This routine builds up to an unexpected sandwich moment. It starts with a flash production of two cards. Then a selected card appears between them with a simple flick. After losing their card once again the two cards are displayed freely. Miraculously the selection appears instantly once more. Finally, the two sandwich cards are lost into the deck. Now the selection is shown freely, then with another flick, the two sandwich cards appear around the selection.
