

## **The Matchbox - Cigarette & Coins Routine by Jonathan Royle eBook DOWNLOAD**

First, a borrowed cigarette magically penetrates a matchbox in the same visual manner as the Cigarette Through Coin trick. Afterwards, the matchbox and cigarette can both (if desired) be examined and be seen as completely normal.

A small purse frame is then removed from the pocket, and four coins are made to appear from inside it.

One by one, three of these coins vanish from your hand and appear inside the matchbox.

The fourth coin disappears, and reappears again, inside the matchbox -- held between the hands of an audience member!

All four coins are then made to vanish completely into thin air. Not only that, the matchbox itself transforms into a giant coin, bringing this fast-paced routine of powerful magical moments to a strong conclusion.

The routine is adapted from "Game & Match," as once sold by The Supreme Magic Company (who gave Jonathan, in his former stage name of Alex-Le-Roy, permission to publish his alterations, additions, and handling). A true miracle for your audience!!
