

Move Across by Joel Dickinson Mixed Media DOWNLOAD

A cross is drawn on the top corner of a selected and signed playing card. Then the magician places the signed card between the cellophane and the box, and the cross visually travels from one corner of the card to another. The card is removed and handed out for examination.

Move Across is the most practical animated ink effect available. You will perform this, without a doubt.

Worried about arts and crafts? Don't be, this will take only a minute to make and you're good to go. Use any deck of cards.

This is practical, looks magical, packs a punch and you are left super clean. By the way, you're not limited to crosses; many shapes and drawings are possible. Use your imagination and make other symbols move: smiley faces, stick men, circles, ESP symbols and more.

"That is amazing, I have no idea how you are doing it."

- **Myke Philips, Magician, and creator**

"Brilliant! Finally, a moving ink effect with no messing around. I can even use my own deck."

- **Darren Robinson, Magician**
