

Insert by Stefanus Alexander video DOWNLOAD

One of the great magical effects is demonstrating Solid Through Solid. **INSERT**, our new video download, will enable you to perform this amazing feat for your audience.

Best of all, this incredible Solid Through Solid effect is impromptu.

Any small item (coin, key, money, etc.) can be provided by your spectator and then signed.

Use a borrowed card box and the spectator's signed object. The magician opens the cellophane and tosses the object from the outside of the box to the inside of the cellophane. This looks amazing and, frankly, impossible! Spectators will not believe what they have just witnessed!

Points to remember:

- Purely impromptu
- No gimmicks
- Can perform anywhere and anytime

All taught to you on this new video download.
