

NoteOut by Bilal Abidi video DOWNLOAD

THE DEMO VIDEO IS NOT A CAMERA TRICK!

The magician makes a drawing of a folded-up bank note, and simply by flicking the drawing for an instant, the bank note VISUALLY POPS out of the drawing!

This effect is different from others on the market, as it really does look like the bill comes STRAIGHT THROUGH the drawing (see the demo video).

The **NoteOut** gimmick is very easy to make, and you probably have all the supplies already at home!

You can also use this for other small, flat objects like coins!

This instructional video download explains how to make the gimmick and how to perform the effect.

YOU DO NOT WANT TO MISS OUT ON THIS!
