

## **Z - Color Change by Ziv video DOWNLOAD**

An incredible color change that occurs in the middle of the deck! This is from the creative mind of Z!

Effect: Fan the deck, showing that no cards are face up. Turn one black card face up. Fan again, showing that it's still there. Then, with a magical gesture, fan one final time to discover that the black card has now turned red! Looks great!

Easy to do.

Extremely visual.

Fun to perform.
