

## Card in Hole by Taufik HD video DOWNLOAD

Here's a marvelous effect whereby a card that is clearly seen miraculously changes before spectators' eyes! The card is placed face up between two cards that both have large holes in their center. The selected card can clearly be seen through the hole. Nevertheless, with the magician's secret pass of the hand, the card instantly has changed into another! It is removed from between the two hole cards and shown to have really changed. The spectator is free to choose the card, and the card can also be signed. No magnet, no elastic, no flap, no force. At the end of the routine, the card can be examined by the audience. This is a perfect ending for your Ambitious Card routine.
