

Elastics by Brancato Mauro Merlino video DOWNLOAD

Effects involving solid-through-solid penetrations always generate great reactions by their sheer impossibility. Here's a routine you can learn from this new video download.

Elastics is a rubber band that can go through any object, any bill, any cell phone, any card, and much more. **Elastics** is a gimmick that's easy to build and easy to perform. The instructions in the video download are easy to follow. The effect's reset is immediate, and spectators can examine everything at the end of the performance. Enjoy and blow your friends' minds!
