

The Committee by Sam Wooding eBook DOWNLOAD

Imagine this -- you leave your house without any mentalism routines and someone asks you to amaze them. You've somehow forgotten your anagrams and you want something sure-fire and snappy. Well, **The Committee** is the answer!

Paint this scene in your mind: You explain to the spectator that you are incredible at predicting anything. To the point where you can win any game! You show the spectator an envelope.

On the front of the envelope, it reads "The Game of Life." The spectator then chooses: a random vehicle, whether or not to get married, whether or not to buy a house, and a random number for an anniversary (a number from 1-70). You then show that you have predicted everything they just chose.

It would be normally be impossible to predict all of this with 100% accuracy, with one prediction in play and completely verbal! Not with **The Committee** by Sam Wooding!

Welcome to **The Committee**!
