The Paranormal Entertainer by Paul Voodini eBook DOWNLOAD

Perfect for Halloween or any time of year when the presence of spooks is required!

This was Paul Voodini's first-ever manuscript and has been a jealously guarded secret until now! Available to the mainstream for the first time!

This detailed manuscript teaches the mentalist and bizarre magician how to run completely ungimmicked evenings of paranormal entertainment. It covers introductions and establishing the right atmosphere, opening routines to involve the guests and put them in an expectant mood, a Ouija board and/or glass moving session, and finally the actual seance! An enthralling, wondrous, and terrifying evening for all your guests - and all done without a single gimmick! That's right - no billet switches, center tears, impression pads, invisible thread, magnets, stooges or even balloon models! This is as near to the real thing as it's possible to get!

Written by Paul Voodini, this eBook is the result of working in a predominantly shut-eye market for many years, hosting seances, glass moving and Ouija sessions, ghost walks and psychic experiments. This eBook details how to utilize that most powerful of weapons - the human mind! Includes full script and detailed breakdown including real life experiences.
