

The Chimney Sweep's Victorian Oracle by Paul Voodini eBook DOWNLOAD

In Victorian London, the chimney sweep was a man who lived half way between night and day, between light and dark. A man who breathed smoke and handled hot coals. A man who, it was believed, talked to demons and angels as he made his way upwards through the chimney from the hearth to the stars. A man who cheated Death on a daily basis. To shake hands with a sweep was to bring yourself good luck, and if a woman should kiss a sweep, then folklore dictated that she would be pregnant within the year, and the child would have the "gift" of clairvoyance. And for those souls brave enough to cross his palm with a silver sixpence, the sweep would always carry with him his pendulum and his cards and he would tell your fortune. Good or ill. The sweep would see it all.
