STRATAGEM by Abhinav Bothra - Video - DOWNLOAD

Stratagem is a 3 phase modular routine using a regular pack of playing cards. It is easy enough for a month-old beginner and at the same time delivers the impact of an expert. Each phase of **Stratagem** stands on its own and, at the same time, builds upon the previous one.

Phase I (CAAN on Steroids): A crossbreed of 'Do As I Do' and 'Card At Any Number'. CAAN not just once but twice - once in the hands of the performer and the other time in the hands of the participant with zero sleights involved. Each time all the decisions are made by the participant.

Phase II (Remote Viewing): With your back turned, the Participant cuts the pack at a random spot, sees a card, and buries it back in the middle. You instantly guess where their card is and later tell them what their card is.

Phase III (Mind Reading): Participant takes two cards from a spread (away from performer's view). The performer starts by calling out the sum of cards' values, moving on to individual values, color and lastly the suit.

Stratagem uses a normal pack of playing cards and is 99% self-working with only 2 sleights/card techniques that are easy enough for a month-old beginner. It needs 3 minutes preparation that can be done anywhere, anytime (no arts and crafts).

Download the video and learn this great routine!
