

## Inex by Agustin - Video - DOWNLOAD

Imagine this. You draw random lines on a card box. With just a gentle shake, those lines morph into a word or into the name of a card.

Not only that, you can draw an X on one corner of the box and visually move it to another corner. You can even make it jump to your palm or anywhere you like!

This is a simple but stunning moving ink effect. You can make it in less than one minute.

It's easy, practical, and dope.

Download the video and learn **INEX**.
