

Morphin Time by Monowar - Video - DOWNLOAD

This idea is based on the classical transposition effect.

Performer shows 2 packs of cards. 4 red and 4 black. Then he/she places the black cards on the table and holds the red cards in his hand. As he waves the red cards, they visually change into the black cards. And the red cards are now on the table!

- Only two packs of 4 cards each
- Visual and direct
- Can be done with a borrowed deck
- Pure sleight of hand
