

Watch the Watch by Mott - Sun - Video - DOWNLOAD

A one-coin routine with a powerful kicker!

Mott-sun finally releases the secret to his FISM act!

This is a powerful one-coin effect by Monster Mott-sun.

The theme: your wristwatch. A utility originally designed to tell time makes an unexpected appearance in the end. By "unexpected," we don't mean a surprise like a jack-in-the-box. The patter and effects provide a logical path to the climax.

The method is extremely efficient, and there are no unreasonably difficult parts. It uses no gimmicks so you don't have to worry about refills or prop failure. Once you master it, you'll be using it in many situations.

In addition to the main effect, Mott-sun also explains a technique that allows you to vanish objects like the well-known Raven gimmick, and his original handling of the Toss Vanish.

This is a short video filled with the essence of Mott-sun's work.

We hope you enjoy it.
