

Perdu by Ju - Video - DOWNLOAD

Allan Ackerman's legendary trick Reborn.

Many magicians are seeking for an invisible deck with regular playing cards, and so did I.

I've performed several versions of an invisible deck without a gimmick, but **Perdu** was the most practical one for my performance.

I want to introduce Perdu for your invisible deck routine.

Here's my standard for a good invisible deck routine.

1. Spectators could name (almost) any card before opening a card box.
2. No flipping move before spectators see the back of the chosen card.
3. Simple but practical.
4. Reset within a second.

For this reason, this trick came out as a solution.

Thanks to Allan's permission, I could remake his legendary card trick and share with you.

I hope you enjoy **Perdu**. Download now!
