

Torn to Pieces by Damien Keith Fisher - Video - DOWNLOAD

At some point we have all felt torn to pieces, not knowing what direction to go in. As a magician, you will send your spectators in the right direction, with the clever misdirection. Although, this is a quick illusion it will keep your audience interested. The set up is easy, but a very important part of the trick. The misdirection is natural, clever and sneaky.

You can perform this at any time. It is just a great and clean piece of close up magic. It's all about the set up and sleight of hand, which you will need to practice to get them comfortable and natural. Once you have perfected this illusion, you will tear your audiences minds to pieces wondering what the hell just happened!
