

## **Speed Hole by Mario Tarasini - Video - DOWNLOAD**

We present another visual effect which looks like a real CGI!

The magician shows a card and a black circle.

In front of the spectator's eyes the circle jumps on to the card and turns into a hole!

After the trick the card with a hole becomes normal again without any gimmicks or flaps!

You can give the card to the spectator as a souvenir.

Additional supplies may be needed in order to perform the effect.
