

Impossible CARD by Viper Magic - Video - DOWNLOAD

An Impossible thought of card routine, where the selection is absolutely genuine, no forces, no equivoque.

One box of cards is introduced, and one selection is made. The magician takes out the card and spreads it. One card is face up. Unfortunately it's not the spectator's card, in fact the card is not even important, but as the magician says... the value on the card is important. The value guides us as to how many cards down in the deck the spectator's card will be. The magician counts down, and boom! Exactly at the value the reverse card informed us, we have spectator's chosen card.

A complete miracle in your hands.
