

## LAYOVER by Esya G - Video - DOWNLOAD

The newest floating drinking glass effect! With a unique method, a different method than before!

You show the drinking glass. Then you start holding the straw in the glass. Suddenly you let go of the handle on the glass and the glass floats in the air!

This new method is much more confusing than the standard versions available from the others! The spectators will not believe their eyes!

Works with almost all types of bottles, cans, boxes from around the world!

- No magnets
- No thread
- No string
- No wire
