

Scanning by Asmadi - Video - DOWNLOAD

SCANNING is a magic effect that allows you to find the spectator's chosen card in a unique way.

A deck of cards is given to the spectator to shuffle and a card is selected. The spectator is then asked to re-insert the card of his choice into the middle of the deck and the deck is shuffled again by the spectator. The magician then uses a smartphone to detect the spectator's chosen card one by one, if the spectator's chosen card is detected, the flash light on the smartphone will light up.
