

Linked 2.0 by Kapil Agnihotri - Video - DOWNLOAD

Linked 2.0 is a linking paper clip that features the best unlinking ever, this effect solves all the problems that I had with linking rings.

With the linking rings you have to carry huge props around and they can be very expensive. My solution is linking paper clips which can be borrowed and the magic is much more organic. This is my go to effect.

This is a very easy effect, download it now!
