

Magic Motion by Mario Tarasini - Video - DOWNLOAD

This is a series of some of my favorite tricks that I have created over the past two years!

In the file you will find 3 tricks that are all compatible with each other.

Karate Hole

If you like arts of crafts, it means a product is created for you!
The magician shows a card with a cut-out hole.
He shakes it and the hole splits in half!
The magician shows that the two holes are real.
The trick can be done live, but it's designed for social media.

Lockdown

The magician takes three cards with holes in them.
The Spectator locks all three cards with a lock.
The magician takes the middle card and simply pulls it through the lock!
There is no secret slits on the card.
After the trick, everything can be given a look.

Mr. X

The spectator names any card out loud and without any magical forces.
The magician draws an x on the cellophane of the card box and makes it visually disappear.
The magician pulls the card out of the box and shows that the drawn x has moved on the card that was freely named by the spectator.
But that's not all!
The magician takes the card with and X on it, hits the card box and the X jumps again on to the cellophane of the box, leaving the card unmarked, which can be given to the spectator!
