

World's Fastest Transpo by Mystic Slybaba - Video - DOWNLOAD

Mystic Slybaba shares his favorite go-to fastest close up card effect.

Like the title says, this is the world's fastest transposition of four cards. You arrange four aces in your hands, the red facing the inside, the black on the outsides and instantly they change places.

The handling is very simple and the powerful visuals get great reactions. Every card magician from beginner to professional will benefit from the addition of this effect into their 4 ace routines, or to do if someone says "show me something quick".
