Unison is a mind boggling mystery.

In this effect, the performer hands over to the spectator a few pictures of birds & animals. The names of each of these birds & animals are seen to spell with four letters. The spectator selects one of the pictures, locks it in a box & pockets the other pictures. Next the performer introduces an alphabet deck. The deck is well shuffled & the spectator himself freely cuts the deck into four piles. Surprisingly, the cards on top of the four piles form the exact name of the bird/animal which the spectator has just chosen.
