

Blaze by Thinking Paradox - Video - DOWNLOAD

Blaze is a visual, impromptu demonstration of modern fakirism. Show your incredible resistance to fire.

If you want to scare your friends, **Blaze** is perfect for you. The effect is as follows: at any moment, without any preparation, you borrow a lighter, light it, and place it directly under the palm of your hand with the flame touching your skin, keeping it there for at least 30 seconds without feeling pain or getting hurt. Your hands can be examined at any time; there is nothing to hide.

Here are the key points of the routine:

- It's 100% impromptu; you can perform it at any moment.
- No chemicals are required.
- Everything is completely examinable before, during, and after the routine.
- ~~Blaze techniques are completely safe and painless so the effect can be performed~~ when someone asks you to do a magic trick, even if you have nothing on you.
