

Clear Choice by Thinking Paradox - Video - DOWNLOAD

Clear Choice is a new method for forcing slips of paper using a scientific principle never before applied to the world of mentalism. This revolutionary technique allows you to control the selection of one or several spectators with complete certainty, without needing to switch slips.

Winner of the 1st Prize in Invention at the Spanish National Magic Congress (2016).

- It's a revolutionary force. Based on a scientific principle never before applied to the world of mentalism.
- It's very easy to perform. No great technical skill is needed, and you'll master it in minutes.
- 100% impromptu. You only need a cup and some papers to force any information at any moment.
- Total sense of freedom. The spectator can change their mind and feel confident they have chosen freely.
- No switching of slips. The slips are never out of sight and can be examined before and after the force.
- Complete control over the choice. You will always know in advance the content of the chosen slips.
- You can force any content. Phone numbers, drawings, words, cards... anything you can imagine.
- Great audience interaction. You can use up to 20-30 slips written live by the spectators themselves.
- No magician intervention. A spectator personally collects the slips in a cup and can mix them as much as they want.
- Multiple simultaneous forces. You can force up to 4-5 different slips at once.

Includes 3 high-impact routines:

- **Drawing Duplication:** Enter the mind of a spectator to see through their eyes.
- **ACAAN:** Perhaps the clearest and most direct version of the card at number you've ever seen.
- **Prediction:** Demonstrate a curious superpower you acquired when you were a child.
