

Finder (APP) by Appmazing - DOWNLOAD

FINDER by APPMAZING

*This app requires a phone with a gyroscope, there are a minority of Android phones that do not, if in doubt, download it from Google play and try it for free.

We present you **Finder**, a version of the classic trick "Koornwinder's Kar" in app format, now more comfortable, easy and versatile than ever. Finder has been awarded at the Spanish Magic Championship in 2022.

Appmazing Finder is an application that simulates a detector and allows you to perform incredible effects. With this application, you can find a card, detect who is hiding an object, or use it as a lie detector among many other possibilities.

Whether you are an amateur looking for impressive results in a short time, or a professional illusionist looking to improve your repertoire, this application will be your best ally. Close-up and stage magic, comedy effects, mentalism or card magic are just some of the infinite possibilities that this application offers.

Finder has been designed with three working modes:

360° mode: Allows you to find anything around the phone.

Free hands mode: Allows you to perform effects without touching the phone.

Multiplayer mode: Up to 4 spectators can find their own objects without the magician touching the phone.

Bluetooth: Control the app via the **Appmazing Thumb Controller**, you can perform all kinds of effects without any limits, taking your magic with **Finder** to a new level.

COMPATIBLE WITH ATC: This product is compatible with ATC (Appmazing Thumb Controller) a bluetooth device that is hidden inside a Thumb Tip and allows you to secretly control this application.

- No prior preparation required.
- Multi-method.

- No previous technique or experience required.
- Over 1 hour of ideas and routines.
