

2 Box by Rit Le x HL Magic - Video - DOWNLOAD

TWO BOX allows you to make an accurate prediction of a card that a spectator randomly selects, without relying on any gimmicks or complicated setups. The only tools you need are two decks of cards in different colors.

By utilizing a clever system, you can predict the chosen card with precision, creating a stunning effect that seems impossible. The spectator is free to pick any card, but with this method, you'll know exactly which one they've selected every time.
