
PSI ROLLER by Michael Breggar and Kaymar Magic

Michael Breggar (the creator of best sellers ART ATTACK and BAD BIKES) strikes again with the baffling 'Psi-Roller'.

You show a deck of cards, and then set a prediction face down on the table, before the trick starts. Next you bring out four different dice, each with a different number of sides (D4, D6, D8 and D10).

The spectator rolls the whole lot of dice, generating four random numbers, and then they choose one of them to place on top of the prediction card.

The same procedure is repeated three more times - each time the spectator rolling the dice, generating random numbers, and then consciously choosing one to place onto a face down prediction card, placed down before the dice were rolled.

The cards are carefully removed from underneath the cards, and flipped over...

ASTONISHINGLY, EACH CARD HAS THE SAME VALUE AS THE DICE THE SPECTATOR CHOSE TO PLACE ONTO IT!

Easy to do, includes the dice, bag and special 'something'. Just provide your own deck of Bicycle. You also receive video instructions with Liam's teaching, variations and bonus handlings!
