
Chaos Cube by Alfonso Abejuela

A stunning new take on an all-time classic. "**Chaos Cube**" might just be the ultimate cube-solving routine.

Daryl and Craig Nichols first introduced us to the spectacular world of instant cube solves with the release of "Enchanted Cube" in the early '80s. In the more than 40 years that followed, magicians have regularly used this amazing effect around the globe, including Doug Henning during his TV specials.

Building on this core idea, Alfonso Abejuela created a complete three-phase cube solve routine, unlike anything you've ever seen. By modifying the solves and the gimmick, "**Chaos Cube**" is more visually appealing and stronger than any cube routine we've ever seen.

Each phase is more impossible than the last. First, the cube is solved one layer at a time, then two layers at a time, then the entire cube is solved all at once.

"**Chaos Cube**" may look impossible, but it's very easy to do. You don't need any sleight of hand or difficult memory work. Working with Vanishing Inc., Alfonso has developed a special cube that handles all the hard work for you. Constructed from "RD Regular Cubes", the best cubes for magicians, it is a dream to handle.

The detailed video instructions show you everything you need to start performing "**Chaos Cube**". Besides one super easy false shuffle, there really isn't much to learn. Since you don't even need to know how to solve a cube to perform "**Chaos Cube**", you'll be ready to go right away!

"**Chaos Cube**" looks just as good in real life as it does online, making it perfect for any occasion.

Elevate your cube magic with "**Chaos Cube**" by Alfonso Abejuela!
