
Lux Hominum (Frigium) - Pokerdeck

The old wise say there are creatures beautiful living among us, at a higher frequency where they grant us their positive energies.

They are kind creatures with the mission to guide us through the obstacles of life.

These mystical entities are called "beings of light".

To connect with them, you must silence your world, and search inside of you.

You are the means to contact them and you always have been, you only have you feel them and you can listen to them.

The Jokers are an important symbol of the decks, they represent the most beautiful beings of light that are known, that is: the angels.

On the back I have also followed the classic design of bicycle decks: Two angels framed in circles.

The back symbolizes sunrise and lights bouncing off the horizon.

You will see two sizes of stars, the large ones symbolize the constellation Orion and the small ones that are inside it are called Pleiades.

Both constellations have always been the most important in the spiritual world, I hope that you discover why.

Also each angel is peculiar from one back to another.

On the right side of each box, you can read a maxim of Buddha

The design of the front of each box corresponds to the colors of the suits of the cards.

Each **Frigium & Calidum** deck will contain:

- 52 cards from Ace to King
- 2 Jokers

-
- 1 card with legend
 - 1 gaff card
