## Bicycle Honeybee (Black) - Pokerdeck

Designed by Randy Butterfield, **Bicycle Honeybees** (aka Honeybee V3) feature the same beloved Honeycomb pattern as earlier decks. Our **Honeybee** mascot still walks on the backs but faces in a new direction for enhanced symmetry.

The faces are in a traditional style, with our timeless Beehive Ace of Spades and Beekeeper Jokers, plus a deeper high-roller red used for the Hearts and Diamonds. We've created a custom color scheme and background pattern on all of the court cards.

These cards handle like a DREAM. They are printed on US Playing Cards' embossed Bee stock with their Grade-A "Magic" finish for ultimate fanning, spreading, durability, and longevity. They have also been traditionally cut (the blade goes through the face side) which makes table faro shuffles and other gambling moves significantly easier to accomplish.

We have even included 2 special gaffs in each deck, a double-backer and a blank-facer, which you can use for creative magic routines or as cut cards during your weekly Poker game!

These gorgeous decks are available in Yellow and Black backs. Get yours today!

- New V3 borderless back design
