
Oriental Memory Black playing Cards

Different from the direct and opening style of Western culture, the oriental one is implicit and introverted with a long history, which also puts a mysterious veil on the eastern country, attracting the attention of the whole world.

In the playing cards community, there are rarely playing cards with oriental elements. Therefore, we designed the **Oriental Memory Playing Cards** to show the infinite charm of oriental culture.

Because of the introverted character of the Orientals, we like to incorporate good wishes and sincere wishes into some objects to express our inner thoughts. I condensed all the elements that symbolize the beauty and blessings, as well as the oriental culture and charm into this deck. After two years of making, I finally created this deck of cards.

Oriental Memory Playing Cards are be printed with USPCC, air cushion finish, Casino stock.
