
YUCI (Red) by TCC - Pokerdeck

Simple black design for Cardistry.

In the process of continuous cooperation with consultants and their companies, Yuci used some very front-end digital printing technology. After several adjustments, the ultimate Gray for Cardistry was finally born.

Still using frosted brand box, German black core paper. It is smooth and has a fresh hand feeling (the feeling of paper texture)

2 special cards included (see the pictures for details). There is a special design on the Q of diamonds and it is very suitable for confession or the situation before giving someone a birthday present.
