
Screams at Midnight (3D-Glasses INCLUDED) - Pokerdeck

Halloween fright nights are back! Screams at Midnight playing cards celebrate the creepy, fun monster movies of the past. Devilishly delightful creatures adorn the back design. Just like many of your favorite horror flicks, these cards use 3D technology to make the monsters jump right out at you when you wear the included glasses!

Designed by Phill Smith from a concept by Kevin Reylek, these cards have a fiendish secret built in, allowing you to know the identity of each card without ever seeing the face. This brand-new Occlusion Marking System lets you perform absolutely brain-busting magic with no sleight of hand!

The deck has custom Jokers (plus a reveal Joker!) as well as one of the most incredible custom Ace of Spades designs you've ever seen. A double backer is also included so you can perform even more miraculous marvels!

The custom tuck box also has a 3D design, plus a custom sticker seal.

Printed by USPCC, the cards use a Classic stock with ghoulishly great embossed finish. They are traditionally cut for perfect handling, shuffling, and fanning for all of your Halloween tricks & treats!
