
SHINE 2 (with remote) by Magic 007 & MS Magic

SHINE was a great effect, now **2.0** version is even better.

Magician is able to control a light bulb to light up without even touching it.

Now with this version, you can control **SHINE** to light up 3 different colors; red, green & blue, and it's super bright!

Simple yet efficient and elegant, it's possible to combine with many routines.

SHINE 2.0 - the perfect way to light up your magic!
