
TRUE by Mr. K & Secret Factory

TRUE is an advanced electronic sensing system that looks totally organic. It combines NFC sensing with long-range receiving technology.

Just imagine

You show your audience a nice little custom-made wooden box. Then you take out 4 objects: A ring, key fob, button and a casino chip. Ask your spectator to think of any one of these objects. Then you turn around with your back towards them, let your spectator put any one of these objects into the box...

Without any peek, you know what it is immediately! Then you can do 100% hit mindreading. And this process can be repeated over and over until your audience believes that you have real mental powers!

You can also give your audience member 6 different colored chips. Let them put these into a little carry bag, then just take out one in his hand. You immediately know which color and face value they chose, and you also know which hand is holding the chip!

Not only that, want to perform the "which hand" effect? Three things game effect? Free will effect? **TRUE** can make your dreams come true!

Here is what you get:

- A custom-made wooden box with secret hidden compartments
- Sensor
- Receiver
- 6 different colored chips
- Ring
- Key fob
- Button
- Card
- Arm band
- Charging cable

There are no visual cues. You can use **TRUE** anywhere, anytime without any assistants. Just pure clean mentalism that everyone will love! **TRUE** will change

the way you performing mentalism!
