## Polyantha - Pokerdeck

**Polyantha Playing Cards** by Daniel Schneider was designed to resemble a classic casino deck for the card table. Completely black and white face cards with modified Courts give the deck a modern twist that you haven't seen before.

Due to the well-hidden, yet easy-to-read **Black Roses Marking System**, it's possible with a short glimpse to see which card you hold in your hand. With that feature, you are also able to perform mind reading effects very quickly, without any set-up. The borderless back design of the **Polyantha Playing Cards** creates an eye-catching pattern which especially comes into play during card spreads.

Two extra cards come with the **Polyantha Playing Cards**:

- A **black casino cut card** with the Black Roses Playing Cards logo on one side.
- One **gaff card** with the 2 of Diamonds on top and the 8 of Spades on the bottom of the face.

Printed by The US Playing Card Co. on crushed premium (Bee) paper stock with Air Cushion finish and traditional cut.

**NOTE:** *Although the photographs show the cards with water and ice, these cards are NOT waterproof. This was merely a way to beautifully portray the deck.*
