
Annihilator Deck by VORTEX Magic

A lot of care and thought has gone into the production of these Blank Svengali Cards for mentalists and magicians. The card stock is high quality, so you can write on one side with a Sharpie and it will not bleed through.

The case looks like a box of regular index cards that you might find in a stationery store. There is nothing about this **Annihilator Deck** that screams 'magic cards.'

These are the perfect size cards, so you can also mix them with a regular deck of Poker Bicycle Cards and create even more amazing effects.

This tool is now being used by top mentalists around the world. You can now create practically ANY routine imaginable with the SVENGALI PRINCIPLE.

Force names, countries, times, and more.

BONUS DOWNLOAD TUTORIAL

A 45-minute tutorial by Philip Ryan (FALL) and guest Paul Romhany to get your creativity started.

Both teach their favorite Svengali routines, including Philip's DRAWING FORCE and his AMAZING TOSSED OUT DESTINATION DECK ROUTINE. You will learn how to make up a devious Tossed Out Deck using the **ANNIHILATOR DECK**. In Philip's routine, the spectators see that each card has a different destination written on it, and the cards are shuffled. You then throw out the deck to the audience and you can force four or five different countries. Philip explains his routine in detail for the very first time.

Paul Romhany shares his favorite routines, including his TIME routine and a routine he performed on THE SCRYER PROJECT. By using blank cards, you can perform the exact same routine as a Living Or Dead Test, taking the presentation to a whole new level.
