
Strong Man by Jimmy Strange and Merchant of Magic

Merchant of Magic is proud to present the latest brain child of Jimmy Strange. Strongman is a new method for visually bending metal that is easy to do and super practical.

Metal bending is always best when it happens visually and slowly, it is undeniable. Still to this day, metal bending is one of the strongest most believable pieces of magic you can perform. There is something mesmerizing about watching cold hard steel bend and warp. It cannot be explained as sleight of hand or misdirection, it is more likely to be described as mind over matter or a supernatural phenomenon.. that's what makes it so powerful.
