This is the all new updated version of the best-selling '**Encased**'. The easiest, most versatile and most practical 'signed card to card case' system ever devised.

It's hard to overstate the ease with which the '**Encased**' system allows you to cause a spectator's signed card to suddenly appear inside the card case.

The included gimmicks can be installed in ANY card case in a matter of minutes, transforming it into a discreet weapon of mass destruction. The card case still looks completely normal and can still be used to carry the deck.

The included routines highlight the scope of this clever system and run the gamut of commercial close-up magic. Find out why '**Encased**' has been a best seller for 15 years and why it's remains a go-to system for pro's worldwide.
