

Himber Rings Greater Magic Teach In, DVD

The Eighth Volume in the Greater Magic Video Library Teach-In Series is the Himber Rings. From an idea of Perci Diaconis and introduced into the magic world by Richard Himber, these two gentlemen have given us a wonderful and professional magical effect! Imagine borrowing three separate rings, from three different spectators in the audience and then taking these rings and being able to link them all together and then passing them out to confirm that the rings belong to the spectators and that they are all linked! The performer then unlinks the rings and passes the same rings back to their respective spectators. This video teaches you the different presentations of all of the performers on this video. It also teaches you the handling of the rings and bits that the performers pass on to those interested in adding this classic routine to their acts. Enjoy Billy McComb's classic routine, along with one of Europe's top mentalist, Ted Lesley, who features this in his professional act. Karrell Fox and Pete Biro give many tips and tricks on the routines and no one can simplify effects better than Karrell Fox did! Also enjoy Jonathan Pendragon's fabulous stage and close-up routines of this perplexing piece of magic! If you ever wanted to add this routine to your act, this is the information you need to have and to learn to present it correctly. Add this video to your library for education and research material!
