

Uncovered (Secrets For The Serious Magician) by John Luka

Uncovered is a compilation of first class practical card magic, including some powerful non-card items, written for the serious magician. Featured are several commercial creations that John has had the pleasure of performing in restaurants, at magic get togethers, and at parties for friends. You will find magic that is well within the range of most magicians. The magic is devastating with most items requiring only basic sleight of hand. You won't find any knuckle busters within this volume. But, you will find MANY things you can use. Anything less is unacceptable!

All the items have been photographed and are explained in great detail. Here is what you will find.
