System by Michael Murray

Why settle for a 50/50 when a 50/50 can become a one in 52!

The **System** is a fast-paced multi-phase effect which culminates with the revelation of a thought of card.

Way back in 2017 Michael Murray released what many now refer to as the bible of the 'thought of card' plot. Owing to the work involved in memorizing that system, many customers begged for a simpler alternative. Fast forward to 2024 and Michael is very proud to release the most streamlined 'think a card' reveal imaginable.

Prepare to Flip Out!

With little more required than a simple flip of a singular poker chip, your participant settles upon one card from 52 possibilities in their mind. With no complex fishing procedures or difficult memory work you can almost instantly reveal the card that they are thinking of.

Why carry 52 playing cards when you can carry just one poker chip!

Triple Threat

Couple the above with the additional poker chips supplied and you have a deadly three phased routine that not only makes perfect sense thematically but is guaranteed to blow your participants away.

Under the pretense of displaying your ability to read any opponent at a gaming table, you first intuit the value of a poker chip concealed in their hand. Next you prove your ability to know if they are even thinking about lying.

After gaining an understanding of how your participant thinks, you now have them flip a singular poker chip whist your back is turned. The participant then uses the poker chip to create the value and suit of a playing card in their mind.

With nothing else spoken (the chip can be completely hidden from sight) you can immediately begin to reveal the card that they are thinking of and in some instances, you can even go as far as to describe the exact thoughts that existed

in the participants mind right before you hit them with the revelation.

- Super direct
- No logic puzzles
- Totally hands off

Prop-less version also explained. Deviously simple (learn in mere minutes)

Reveal multiple cards by involving a second participant

Almost zero process (reveal a thought of card in under sixty seconds)

Works in any language (please note that the poker chips are written in English)

Each set includes:

- Three custom printed poker chips
- Velvet draw string carrying pouch
- Indepth downloadable video instruction
