

Triple X by iNFiNiTi

TRIPLE X

is an Xtra Xtra Xtra strong object to impossible location.

Borrow something small from a spectator, such as a ring, signed coin (or mint), and produce it from inside the middle of an unopened, sealed pack of mints that have been in your pocket the whole time.

It doesn't get any more impossible than this.

You have to actually break open the middle of the pack - it's an unbelievably strong sight and sound - the rip - the pop - the burst - revealing their item IMPOSSIBLY wedged in between the other mints as you drop it into your spectator's hands. You can even choose to have fragments of broken mint fly out when you break the pack open. And yes, of course spectators can even take a real mint.

If James Bond carried mints...
