

## Drawn by Armanujjaman Abir

Have a card selected and tear a corner off from that card. Next, you take that corner piece and drop it on top of your deck **visually** and **magically** the card piece **changes** into a sharpie drawing! This looks like CGI but done in real life circumstances.

**Drawn** is not only limited to playing cards but anything small and flat will work e.g. a piece of a bill, sugar packet, billet etc. Simply drop it and change it into a drawing!

Right after the super-visual chance, the card can be handed out for examination and may be kept by the spectator as an amazing, unique souvenir!

The unique, hand-built gimmick is very well built and makes performing this visual gem very easy.

**Drawn** comes complete with ready to perform red backed Bicycle stock gimmick, additional gimmicks and online instructions.
