

## Silence V3 (Black) - Pokerdeck

As a classic representative of the playing cards series produced by King Star, the **Silence** series has been loved by many playing card collectors since its launch.

The Silence series takes the dark and mysterious gothic style and horror fairy tale as the starting point of design and innovates the card box on the premise of combining the theme. The hollow double-layer card box creates a stunning dynamic visual experience of "unmasking" in the process of opening the box. At the same time, the high customization of the playing card face and the exquisite visual experience brought by the hot stamping process of the card box are also the highlights of this series.

On the **Silence V3**, we want to do something different, to explore and break through. While continuing the core of the series, we use a brand-new visual design and more exquisite and gorgeous brushstrokes to focus on and show the gothic elements as the core of this series. The final product will present the highest visual impact and stunning beauty in the entire series.
